Total Investment		\$450.00

Details: It takes about 30 minutes to set up at events and 30 minutes to disassemble and pack away. Will fit in small compact car. At vendor events we charge \$3 per player (\$5 for 2 players). Games last 3-5 minutes. At 6 hr vendor event we average \$500 to \$750 a day. For 3 hour birthday parties we charge \$600 for 6 robots, 1 host and we sell quite a few kits at events. Ask about our franchise options to buy a territory and get discount on kits you stock. Want to make even more money off selling our kits. Buy a 3D printer and we will help you get setup to print your own parts. This will save on shipping & our markup as we only need to ship electronics & hardware to you.

How I built this business in my local area: I live in a small town 1.5 hrs out of Portland Oregon. My town was giving me enough business on the weekends with fairs, birthday parties and other various vendor events. I wanted to grow it and be able to go further out so I rented a small storage units in Portland for \$75 and hired a couple of entrepreneurial high school girls with a car, insurance & drivers license to run events. I now make \$4k plus every month after expenses. We setup at vendor events, corporate events, birthday parties, team building events like summer camps, schools and anywhere people gather to have fun. You can even rent out your setup as it breaks down for easy shipping to your clients for their events. It's a great business opportunity that adults & teens, with an entrepreneurial spirit, could operate.
